

THE AI RESET

RETHINKING LEADERSHIP,
STRUCTURE, IMPACT

A presentation by Jason Averbook in our Townhall session about aligning ourselves with AI in todays time

**EVERYONE IS
SOMEWHERE
NOW.**

**WHERE ARE YOU
GOING NEXT?**

**WE'RE NOT GOING
"BACK TO NORMAL."**

**WE'VE ENTERED THE
NEVER NORMAL.**

CONNECTED

A TECHNOLOGY STORY

≠

CONNECTION

A HUMAN STORY

AN EXPONENTIAL MOMENT

TIME TO REACH 100 MILLION USERS

THE SCALE RIGHT NOW

800M

weekly active ChatGPT users

\$315B

Big Tech AI investment (2025)

**THE COST OF DOING
IS GOING TO ZERO.**

**THE COST OF WAITING
IS GOING TO INFINITY.**

SPEED IS THE STRATEGY.

EVERY REVOLUTION RESETS EVERYTHING

1ST REVOLUTION

1760s

STEAM

Mechanized production,
factories, urbanization

2ND REVOLUTION

1870s

ELECTRICITY

Mass production, assembly lines,
global trade

3RD REVOLUTION

1960s

COMPUTING

Digital systems, automation,
the internet

4TH REVOLUTION

NOW

AI

Cognitive automation, agents,
intelligence on demand

The difference? Previous revolutions took **decades** to mature. This one moves at **exponential speed**.

**WE'RE TRYING TO SOLVE
2030 PROBLEMS WITH**

2010 ORG CHARTS

AND 1990S THINKING.

THE SIGNALS ARE EVERYWHERE

EDUCATION

92% of students use AI tools: universities are rewriting curriculums in real time

Degrees are being questioned: skills and adaptability matter more than credentials

WORK

Entry-level job postings down 35%: the way people start careers is shifting

Managers now oversee AI workflows alongside human teams: a completely new skill

PERSONAL LIFE

Personal AI agents managing health, finances, and schedules: life is being redesigned

Expectations are being set outside work: then carried into the office every day

IT IS 2026 OUTSIDE OF WORK. WHAT YEAR DOES IT FEEL LIKE INSIDE?

OUTSIDE OF WORK

AI plans their travel, manages their health,
tutors their kids, runs their side projects

The future is already here.

INSIDE OF WORK

Same portals, same ticket queues, same
manual workflows they had five years ago

The past is still running.

THE FIVE WOUNDS OF CHANGE

WHAT CHANGE DOES TO PEOPLE

Across hundreds of transformations, five patterns recur. Not predictions. Observations. What happens when technology lands on unprepared psychological ground.

NAME THEM, AND YOU CAN HEAL THEM.
SKIP THEM, AND THEY METASTASIZE.

01 FEAR OF REPLACEMENT

02 LOSS OF MASTERY

03 DECISION FATIGUE

04 TRUST EROSION

05 IDENTITY DISRUPTION

FEAR OF BECOMING OBSOLETE

FOBO

THE AI CONVERSATION HAS CHANGED

2023

CURIOSITY

2024

EXPERIMENTATION

2025

CONSEQUENCES

2026

REALITY

UNCERTAINTY ISN'T A BUG IN THE SYSTEM.
IT'S THE RAW MATERIAL FOR OPPORTUNITY.

@slow_developer

"But now getting to..."

MARCH 2026

WATCH THE REEL

[instagram.com/reel/DbIkpJMSPtb](https://www.instagram.com/reel/DbIkpJMSPtb)

COULD VS. SHOULD

COULD

CAPABILITY

What AI makes technically possible: automation, generation, scale.
The frontier expands every month, faster than we can absorb it.

SHOULD

JUDGMENT

VS

What is actually worth doing: trust, values, consequences. Where
we draw the line stays a human decision, not the model's.

Just because we can doesn't mean we should: **capability is cheap, judgment is the job.**

THE RESET IS **ALREADY** HERE

EDUCATION

30%

of 2025 grads secured a full-time job in their field

Down from 41% in 2024.
The career ladder's first rung is disappearing.

CNBC / Cengage

WORK

50%

decline in new grad hiring at Big Tech since 2019

Entry-level postings down 35% since 2023. AI automates the tasks juniors used to learn on.

SignalFire / Revelio Labs

PERSONAL LIFE

56%

of 2025 seniors feel pessimistic about their career

52% of Class of 2023 were underemployed a year after graduation.

Handshake / Burning Glass

The bottom rung of career ladder is disappearing. The question is what replaces it.

**MOST
COMPANIES
TODAY
ARE HERE**

**WE'RE NOT
AUTOMATING WORK.**

**WE'RE AUTOMATING
DYSFUNCTION.**

THE REAL
QUESTION IS NO
LONGER WHAT CAN
AI DO?

IT'S HOW DO WE
REDESIGN WORK
AROUND AI?

THE FUTURE OF WORK IS NOT

HUMAN VS.
MACHINE

THE FUTURE OF WORK IS

HUMAN **X**
MACHINE

**AI DOESN'T REPLACE
HUMANS.**

**HUMANS WHO USE AI
REPLACE HUMANS
WHO DON'T.**

WORK MUST BE
DESIGNED ACROSS
**HANDS, HEADS &
HEARTS**

HANDS, HEADS, HEARTS FRAMEWORK

HANDS

EXECUTION
AUTOMATE

HEADS

THINKING
AUGMENT

HEARTS

PURPOSE
AMPLIFY

FOCUS NOT ON MVP... INSTEAD FOCUS on MLP: Most Lovable Proposition

THE FOUR RESETS AI FORCES

MINDSET: From control to trust, from certainty to experimentation

HEARTSET: From compliance to co-creation, from fear to transparency

SKILLSET: From knowing answers to learning continuously

TOOLSET: From tools leading to humans leading (tools serve)

THE 4SET MODEL

MINDSET SHIFT

OUTCOME

EXPERIMENTATION

ABUNDANCE

5 MINDSET SHIFTS

CONTROL	→	TRUST
PROCESS	→	OUTCOME
CERTAINTY	→	EXPERIMENTATION
SCARCITY	→	ABUNDANCE
INDIVIDUAL EXPERTISE	→	COLLECTIVE INTELLIGENCE

THE OLD PLAYBOOK WON'T WORK IN A NEW WORLD

HEARTSET SHIFT

TRUST

TRANSPARENCY

CO-CREATION

COLLABORATION IN PROGRESS

**CHANGE ISN'T
THE ENEMY**

IT'S THE STRATEGY

THE MINDSET SHIFT • 2026+

Two mindsets for *constant change*

Organizations don't need better change programs: they need to become *changeful*.

SKILLSET SHIFT

PROMPTING IS NOT THE SKILL

THE SKILL IS WORKFLOW REDESIGN

THE FEAR WE DON'T NAME

FOBO IS REAL

52%

of U.S. workers are worried about
AI's long-term career impact

37%

of business leaders expect to
replace workers with AI by end of 2026

79%

of people express low trust in
businesses to use AI responsibly

FOBO isn't a weakness. It's a signal. *Leaders who acknowledge it earn trust. Leaders who dismiss it lose their people.*

THE KNOWLEDGE WORKER

Skills that make a knowledge worker

essential in an AI-first world

01

Contextual judgment

Know when to override the machine.

02

Process fluency

See how work really flows.

03

Prompt craft & iteration

Refine, constrain, pressure-test.

04

Change translation

Turn shifts into language people adopt.

05

Data storytelling

Make insight actionable, not just pretty.

06

Relationship-led influence

Trust and influence AI can't replace.

TOOLSET SHIFT

TECHNOLOGY COMES LAST,
NOT FIRST

TOOLSET: USE CASES

01

CONVERSATIONAL AI

EMPLOYEE SELF-SERVICE, POLICY Q&A, MANAGER COACHING

02

GENERATIVE AI

JOB DESCRIPTIONS, INTERNAL COMMS, TRAINING CONTENT

03

ANALYTICAL AI

WORKFORCE PLANNING, ATTRITION PREDICTION, ENGAGEMENT

04

APPLICATION AI

NO-CODE APPS, CHATBOTS, WORKFLOW AUTOMATION, INTERNAL TOOLS

YESTERDAY

CHATBOT

- You ask, it answers
- Single turn, no memory
- Generates text only
- Lives in a browser tab

NOW

AGENT

- You delegate, it executes
- Persistent memory
- Takes action across apps
- Works autonomously 24/7

Every role becomes a manager of AI agents.

**AI CAN DRAFT
THE WORK.**

**THE LAST MILE
IS OURS.**

AI ISN'T COMING. IT'S HERE.

**THE QUESTION ISN'T
WHETHER TO CHANGE.
IT'S WHERE YOU'RE
GOING NEXT,
AS AN ORGANIZATION
AND AS AN INDIVIDUAL.**
